Professional Summary

Result-oriented Full-Stack Software Developer with hands-on experience architecting and deploying scalable, multi-tenant SaaS and fintech applications. Proven capability to work autonomously in distributed environments, build secure backend logic using Laravel/CodeIgniter, and manage high-availability cloud infrastructure on AWS. Adept at automating complex administrative pipelines and driving business data accuracy across local and international engineering teams. I am always looking out for exciting software development opportunities where I can solve deep technical challenges.

Tech Skills

Frontend: React, JavaScript, jQuery, HTML, CSS, Bootstrap
Backend: PHP (CodeIgniter, Laravel)
Databases: MySQL, MongoDB
Other: Git, CI/CD (GitHub Actions), REST API, Role-Based Access, Deployment, Client Training, AWS (EC2, S3), Linux

Professional Experience

Founding Engineer | 2022 - Present
Gradescope School Result Management System (portal.gradescope.ng)

- Engineered and deployed a multi-tenant SaaS portal streamlining academic administration for **multiple institutions** and **thousands of users**.
- Configured and deployed production environments on **AWS EC2**, tuning server performance and maintaining **99.9% infrastructure uptime**.
- Maintained high **client satisfaction** by providing ongoing performance optimization, hotfixes, and iterative feature updates based on user feedback loops.

Founding Engineer | 2026
Vtuexchange Cryptocurrency & Gift Card Trading Platform (exchange.vturecharge.com)

- Architected and launched a secure digital asset trading engine, successfully **reducing average transaction processing times by 50%**.
- Integrated secure backend payment validations and API workflows using **Laravel, React, and MySQL** to ensure transaction data integrity.
- Implemented strict security protocols including **Role-Based Access Controls** to safeguard sensitive client transactional data.

Projects

- HyreMe(hyreme.rf.gd):** Built a responsive freelance marketplace leveraging **HTML, CSS, Bootstrap, JavaScript, jQuery, PHP OOP, and MySQL**, enabling direct client-to-professional connections.

Certifications

- W3schools **HTML, CSS, JavaScript, React, PHP** Certifications.
- Moat Academy **Full Stack Software Developer Boot Camp Certification**.
