Professional Summary

I am a full-stack software developer with hands-on experience building real-world applications for schools, including a comprehensive result management system used by multiple institutions. I create scalable, user-friendly software that streamlines administration, automates data processing, and improves data accuracy. I am seeking a challenging role where I can leverage my skills to deliver impactful solutions and grow as a professional developer.

Professional Experience

Full Stack Software Developer | Freelance - 2022 to Present
